

Example L^AT_EX talk

Jeremy Sanders

October 2011

This is the first slide

- First point
- Second **important** point

Another slide

- Predefined colors are blue, red, black, white, cyan, magenta, yellow, green.

Coloured formulae:

$$A = \pi r^2:$$

$$\int_0^r 2\pi x \, dx = \pi r^2. \quad (1)$$
